Using
Universal
Jobmatch –
MI Reports

LABOUR MARKET INTELLIGENCE (LMI) DATA

We use the LMI data to close the Skills Gap between what the employer is looking for and what our clients are able to offer.

- *Delivering provision to fit the labour market of our area.*
 - *Working with employers who have vacancies and understand their skills requirements.*

The purpose of this is to improve the clients prospect of gaining employment.

UNIVERSAL JOBMATCH REPORTING DWP WEBSITE

- As part of the new Department of Work and Pensions (DWP) Universal Jobmatch website, LMI data reporting is now available directly from the website.
- Universal Jobmatch vacancies and information generated by this are driven by employers.
- Using the LMI data available we can now get a 'live' view of what is happening in the market place now - both employer and client activity.

AVAILABLE REPORTS – EXAMPLES

Client/claimant activity

- How many claimants in the area.
- Qualification level of claimants.
- Occupations sought by claimants.

Employer activity: Vacancies

- Vacancies posted/available.
- Employers using Universal Jobmatch.
- Career levels sought by employers.

Reports can be generated from national level through to individual wards.

Reports can show a day view, a weekly total or date month by month.

EXAMPLE REPORT
