

Resources for flexible learning

Making the most of provider developed resources to support flexible learning

What are they?

Providers working with the Skills for Life Support Programme in 2009-10 have developed and shared flexible learning products and resources as part of the programme.

Some provider products focus on the process used to develop and evaluate these resources; some include access to the actual resources and others describe what has been produced and may include a link or 'guest' log in to sample the resources on the provider's Virtual Learning Environment (VLE).

To access **all** the different flexible learning resources click [here](#)

How to use them

These resources have been developed by individual providers to suit their particular requirements and context. Some resources are available to use directly by another provider but many, particularly those accessed on a provider's own VLE, will provide examples and ideas of what might be developed.

More about what's available

This table lists some of the resources that are available, together with a brief description of what has been developed. Click on the provider name to view the resource.

Provider developed resources for online flexible delivery	
Essex ACL	Essex ACL has developed and trialed an online Entry Level 3 numeracy course. The materials include a link to its Moodle to view ten of these modules.
Newcastle Under Lyme College	Find out about Newcastle Under Lyme College's VLE resources for numeracy at Level 1.

<u>Ludlow College</u>	Ludlow College has developed VLE resources for numeracy from E3 to L2.
<u>Leicester College</u>	A detailed guide on the process of developing a VLE to support Functional Skills and Skills for Life.
<u>Cambridge Regional College</u>	Development of a VLE to support LLN learners in the workplace. The VLE materials are to practise rather than teach skills. Guidance for tutors and learners is included.
